

ARID

MICROFIBRE DRYING TOWEL

- **DUAL LAYERED**
- **TWISTED FIBRES**
- **EDGELESS**
- **50 x 80cm**
- **RED**
- **600gsm/pc**
- **NO CARE LABEL-** [avoids scratching]
- **1 pc /bag. 25 pieces per shipping carton.**

This specialist towel is designed for use on vehicle surfaces that have been thoroughly washed clean.

The DRYING TOWEL is supplied ready for use, and for Optimum Performance **ONLY WASH IT WHEN IT IS ACTUALLY SATURATED WITH DIRTY WATER.**

NB: This specialist towel should only get wet and not dirty.

When washing DO NOT USE Fabric Conditioner, and keep the wash temperature ideally to 30°C but no higher than 40°C. Wash separately and then allow to dry naturally.

After use you may find the occasional longer stands of pulled fibre. This is not a fault, just a feature of twisted fabric microfiber towels; simply cut the extended fibre carefully away. When the towel has dried, store in the plastic bag, away from any risk of picking up contaminants.

APPLICATION METHOD:

Apply the towel lengthways to horizontal surface areas, and then pull down/dry the excess water. For full method in use visit our YouTube channel.
