WHEEL CLEANER

POWERFUL & USER FRIENDLY CLINGING-GEL WHEEL CLEANER

- Specially formulated clinging-gel-foaming wheel cleaner
- Viscous action for fast and efficient removal of burnt-on black brake dust from lacquered alloy, painted steel and plastic wheel trims.
- Safe, non-fuming formula with a pleasant fragrance.
- Quickly removes road traffic film, dirt and oil to leave wheel surfaces clean, bright and shiny.
- Non-corrosive to skin; safe on plastic and tyres.

Directions for Use:

Ensure wheels are cool. Do not apply in direct sunlight. Remove any loose dirt. Spray Wheel Cleaner directly onto the wheel, ensuring even coverage. Agitate with a wheel brush if required. Leave for 2-3 minutes to penetrate the dirt, up to a maximum of 10 minutes. Do not allow cleaner to dry out or staining may occur. Rinse thoroughly with a high pressure rinse, using clean water.

Caution: Anodised, un-lacquered or damaged wheels and trims may react adversely to any strong cleaning solution. If in doubt test a small area first. Do not use on stainless steel as staining will occur. Do not use on magnesium alloys, anodised alloys or un-lacquered alloy wheels or on any aircraft components.

Code: XP-90026

Pack Size: 500ml
